- 40 oz Palm Carpet
- Colored Matched Helm
- Rockford Fosgate Speakers (4)
- Stainless Steel Rub Rail

peace

Peace of mind

The Industry's Best Warranty

A Bennington is about enjoyment and the feeling of being carefree. Bennington goes to unprecedented lengths with the industry's best warranty. A Bennington is covered in ways no other manufacturer will match. Here is the formula for the best warranty in the business:

Stem-to-Stern Warranty

The first five years are on us. You get a stem-to-stern warranty on all materials and workmanship. Carpet, upholstery, electronics, all covered, worry-free. The engine is covered by the manufacturer's warranty.

Limited Lifetime Warranty on Structural Components

You get a limited Lifetime Warranty on the structure, pontoons, gates, channels, motor mounts and seat frames. If it fails, we fix it. Plan on celebrating your new baby's college graduation on your Bennington. It will still be perfectly sound.

Limited Lifetime on Deck

You get a limited Lifetime Warranty on the wooden deck. Since our boats flex less and we fasten most things through the deck to the frame below, your 7-ply, pressure-treated, marine-grade deck will have a very long life.

10-Year Transferable Warranty

Bennington limited Lifetime Warranties are transferable within 10 years, adding to the re-sale value of your boat.

No Supplier Hand-Offs

Bennington does not hand off warranty responsibilities to its suppliers. Bennington takes care of warranty claims at the dealer, rather than giving you the name of a company that makes the canvas, stereos, or carpet. Bennington sold you the boat. Bennington fixes the boat.

Dealer Payment

Bennington pays full retail labor rate to its dealers for warranty repairs. This ensures warranty work is completed quickly with your complete satisfaction in mind.

No Pro-Rating

Bennington does not "pro-rate" warranty items. There is no declining scale that forces you to prove history of ownership or debate judgments about remaining value. Pro-rating is common in the industry, but not at Bennington.

For the sixth consecutive year, the NMMA has recognized Bennington Marine with their CSI Award, an independently measured Standard of Excellence in Customer Satisfaction.

innovation

Bennington Built for Pride of Ownership

Bennington Marine Group continually strives to expand the horizon for boating enthusiasts. Each time we innovate, our customers reap the benefits of improved design, function and quality. Last year, we launched the all-new Q Series with progressive materials never seen before in the pontoon industry. The QXi offers dent resistant side panels (DRP™), compound radius extra-wide rails, incredibly soft furniture with unique incliner seating and a sophisticated profile unlike any other pontoon.

For 2008, we are pleased to introduce the inventive new Bennington RCW center walk-through, the most distinctive I/O available today. With the look and feel of a motor yacht from the stern, the ride and handling of a runabout from below, and the comfort and expanse of an original Bennington from above, the RCW is easily the most well-conceived pontoon on the market.

From the stern, you'll find our unique aft-facing super lounges with center walk-through design and fiberglass swim platform. Below the lounges is a power actuated engine hatch lift system as well as a hidden privacy enclosure area. Complete the experience by upgrading the Rockford Fosgate® stereo system to include eight speakers, stern remote stereo pad, amp and subwoofer.

From below, you'll discover the most innovative performance design on the market, Bennington's new Elliptical Sport Package (ESP), which provides stability and performance, planing ability and a tight turn radius for banking. The overall ride resembles a fiberglass monohull.

From above, you'll find all of the amenities you've come to expect from Bennington plus a lot more. Our new *SRT* stain resistant vinyl is standard on every Bennington. You'll also find an optional raised helm platform for an improved 360-degree view from the helm, and our custom polished aluminum light pod with LED docking lights.

As always, we offer individuality in a sea of look-alikes.

Prime

2008 **Q Series**

Luxury

Structural and Aesthetic Refinement

Step aboard. At the touch of a button, the beautifully arched bow gate opens hydraulically, welcoming guests who are inevitably surprised by the magical gate. The console is a thing of beauty. **Bennington makes the only true automotive-style console in the industry.** It is made as a one-piece, high-gloss, fiberglass structure with smooth lines, superb instrumentation, and a tilt-steering wheel that looks as if it came from a luxury Italian sports car. The generously proportioned captain's chair supports in all the right places. It fits you perfectly, and even has an adjustable height pedestal. It is an inviting place to begin your journey.

If the sun is too much, you may choose to activate the hydraulic bimini cover (optional). The manual version goes up in seconds, but the hydraulic bimini is true luxury.

An option in the Q Series offers a real granite table top on the 54-inch galley. The cool touch of real granite is very different than the feel of resin imitations.

Your passengers will enjoy the ride. Feet sink into the lush, 40oz carpet. Everyone sighs as they lean back into the embrace of a Bennington incliner or chaise lounge in butter-soft upholstery. Pick up the remote and activate the enveloping sound of a 4 speaker Rockford Fosgate system.

The expression you see on the faces of people in other watercraft may include a touch of envy, unless they too are piloting a Bennington.

2008 Q Series

2575 QXi shown in Onyx

2275 QXi shown in Colonial White with Mahogany accents

A Bennington is right for you if you want room to move, space for a few more friends, and relaxing comfort in addition to exhilarating performance.

Coffee Table *Optional*

It's more than a table. It is finished in Q Series style with a granite top, flanked by stainless steel cup holders and is surrounded by soft-touch vinyl. But lift the top and you'll find your beverage of choice in the built-in cooler.

Dent Resistant Panels

Your Q Series boat will look good longer with the revolutionary DRP™ panels. These panels are made of tough, resilient polycarbonate, the same polymer used in motorcycle helmets and as a sandwich layer in bulletproof glass. The surface bounces back from those annoying dent-causing accidents with anchors, docks and other boats.

Inliner Seating System™

Enjoy yourself as you relax in the patented Inliner Seating System. As you move back, the seat slides outward and the back rotates down slightly, to provide delightfully complete support.

Rails

Touch any rail on a Q Series boat and notice the attractive profile and multiple grooves, designed for visual and tactile appeal. The rail shape and the extra thick tube walls add high strength.

Cast Aluminum Light Pods

These polished, cast aluminum light pods serve as both navigation lights and headlights, using multiple, very bright LEDs which use very little energy and last so long that they may never need replacement.

2275 QXi shown in Colonial White with optional Chaise Galley

2008 Q Series

Bow Gate

An engineering marvel, the Q Series features a unique Bow Gate which opens hydraulically on the compound radius bow.

Soft-Touch Vinyl

Undeniably the softest vinyl available enriches the innovative seating on the Q Series. The vinyl is protected by BLOCKade,[®] an advanced topcoat formula providing increased stain resistance, higher abrasion resistance and better cleanability.

Armrests

The padded armrests raise the level of comfort in Q Series. Trimmed in wood grain, finished with a stainless steel cup holder.

Telescoping Ski-Tow Pylon *Optional*
Conceals beneath the sun bed and lifts up for action.

20-Inch Chaise Galley *Optional*

Enjoy convenient refreshments in a compact form. It has a granite insert, stainless steel rail, cup holders and faucets and space for an optional refrigerator.

Dimensional Insignia

This handsome, new, 3-D insignia in a bright chrome finish will announce the wisdom of your selection of the premier pontoon boat in the industry.

Rockford Fosgate Sound System

A true revolution in marine audio, this system gives you brilliance, accuracy and depth. With the optional sub-woofer, you have sound you can feel as well as hear.

2008 R Series

of excellence

The Boat That Made
Bennington's Reputation

The R Series is Bennington's largest series, with multiple floor plans, boat sizes, engine choices, two and three pontoon configurations and a multitude of options to fit any boater's needs. **This is the series that made Bennington's reputation for extraordinary seating comfort and frame strength with less flex for a smoother ride. Made with superior materials and dozens of innovative features, Bennington redefined pontoon boating.**

Like fishing? You'll find an R series boat with a live well. Want performance? Choose your engine, ski pylon and pontoon configuration. Want luxury? Choose a real granite table top and a sound system that rocks your world. Like long trips and exploration? Choose the 33 gallon, center mounted fuel tank and the GPS system. It's all here, for your boating pleasure.

No other boat is built like a Bennington. This is the series that introduced features to redefine pontoon boating.

Upholstery
Relax in the feel of the R Series' exclusive, deep grain, soft-touch vinyl. Enjoy the beauty of fresh designs, new patterns, surfaces and colors. See the full selection of colors on page 53.

Instrument Cluster
The gauges have red markings for visibility, fog-resistant lenses and Deutsch electrical connectors designed for severe conditions. Gauges include tachometer, voltage, trim, fuel, hour meter and speedometer.

Chrome Dimensional Badge
Crisp, glistening, and dimensional, the new badges are a handsome, slightly understated reminder that you've made a choice for quality.

Coffee Table *Optional*
Lift the faux granite top to reveal the built-in cooler. The table is wrapped in soft-touch vinyl and features three stainless steel cup holders.

Console
The automotive-style, one-piece, 40-inch fiberglass console has fog-resistant, illuminated, chrome-ringed gauges, large rocker switches and custom, wood-grained steering wheel.

Cast Aluminum Light Pods
These polished, cast aluminum light pods serve as both navigation lights and headlights, using multiple, very bright LEDs which use very little energy and last so long that they may never need replacement.

2575 RCW I/O shown in Steel Blue with Steel Blue panels

2575 RL I/O Anniversary Edition shown with Wineberry panels

Port Table Group Optional

This convenient port table group is a fiberglass pod that includes three cup holders, a speaker and courtesy light. A small table surface is finished with a stainless steel accent.

In-floor Storage Optional
In-floor storage is an available option in both two and three tube models.

RCW Privacy Enclosure

The underside of the port side lounge conceals a privacy curtain. The lounge lifts to make the curtained changing room easy to deploy and convenient to stow, without sacrificing any seating area.

RCW Engine Access

The entire stern lifts hydraulically at the touch of a button, for easy access to the engine compartment. The wide access makes service more efficient, and because the cover lifts from the front edge, the engine compartment is accessible even when on the water.

Rockford Fosgate Sound System

A true revolution in marine audio, this system gives you brilliance, accuracy and depth. With the optional Rockford speakers and sub-woofer, you have sound you can feel as well as hear.

Garmin™ GPS System Optional

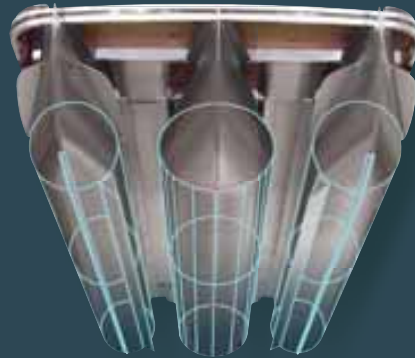

Know exactly where you are, and exactly where the fish are. Choose from chart plotters, fish finders and sounders. With brilliant color TFT displays and ultra-dim backlight mode, you can see any Garmin screen clearly, in bright sunlight or after sundown.

THRILLING PERFORMANCE

Performance Packages for Enhanced Responsiveness

Pick your poison, as they say... whatever your performance requirements may be, Bennington has the answer. We offer a selection of three, individual, triple-tube performance "packages" that can be added to any Bennington pontoon model starting at 20-feet and above.

Elliptical Sport Package

Innovation meets the water with Bennington's Elliptical Sport Package. ESP provides stability and performance, planing ability and a tight turn radius for banking. The secret is an elliptical center pontoon with twin performance foils and the addition of Teleflex power-assist steering. The ESP displaces more water and sits higher for a smooth dry ride. In fact, this ride is comparable to a fiberglass monohull, only better. (Available in 20-inch or 25-inch transom) (I/O and Outboard configuration)

Package includes two 25-inch diameter pontoons, 32-inch center Elliptical tube, Twin Performance Foils, Sea Star hydraulic steering with Teleflex power assist system and underdeck waveshield. *Maximum horsepower rating 350 hp with "i" Series 25-inch transom*

Performance Plus Package

The original performance enhancer and still a leader, the Performance Plus Package offers a planing hull with outstanding overall performance. (Available in 20 or 25-inch transom) (I/O and Outboard configuration)

Package includes three 25-inch diameter pontoons, three pairs of lifting strakes, Sea Star hydraulic steering, and underdeck waveshield. *Maximum horsepower rating 300 hp with "i" Series 25-inch transom.*

Performance Package

The Performance Package provides additional lift and overall performance improvement to any Bennington 20-foot and above. (Available in 20-inch transom only).

Package includes three 25-inch diameter pontoons, Sea Star hydraulic steering and underdeck waveshield. *Maximum horsepower rating 150 hp with standard 20-inch transom.*

Performance Enhancers

Underwater dynamics are part of the equation in Bennington's Performance Package. You expect immediate response and cruising smoothness in your Bennington. With the right appointments underneath, that's exactly what you'll get.

2008 PERFORMANCE PACKAGES

Two Tubes or Three Tubes, You Decide

Bennington makes both two-pontoon and three-pontoon boats. How do you decide which type is right for you? Two tube boats are lighter, more fuel efficient, and perfect for cruising. Three tube boats have attractive performance qualities that include quicker planing for skiing speed. Here is the breakdown.

A Two-tube Boat is Usually Better if:

You prefer a boat that is lighter and uses less fuel.

You often cruise at a pace that doesn't require full engine power.

You generally entertain groups of six or less on your boat.

You May Want a Three-tube Boat if:

You enjoy performance, speed and want much more power at the prop.

You see boating as a sport rather than a respite.

You often entertain groups of more than six.

For ultimate comfort and performance enhancement without stepping into triple-tube performance packages, try these great options...

Underdeck wave shield provides a smooth quiet ride at higher speeds by preventing "surging" under the deck. (Available on pontoons from 18 to 28-inch)

Lifting strakes provide additional lift for a faster running surface. For optimum performance, lifting strakes are only recommended with 20-foot boats 90 hp and above, 22-foot boats 115 hp and above, and 25-foot models 135 hp and above.

Sea Star Hydraulic Steering offers ease of steering in pontoon boats using 90 - 150 hp engines. Power Assist Steering (requires Sea Star Hydraulic option) increases boat steering exponentially and is recommended for high horsepower, 25-foot models and above.

PERFORMANCE

SMOOTH

2008 PERFORMANCE PACKAGES

All the excitement of superb design is yours with Bennington

SSR Console

The one-piece, fiberglass unit comes with hammered aluminum-finished dash and steering wheel trim. It has chrome-ringed, black face gauges with fog-resistant lenses.

Effortless power, control that almost reads your mind, yet room to move with a private place to change into swimsuits. It's the Bennington weekends that give you the strength to go to work on Mondays.

Many options are available to power your Bennington. A favorite I/O choice is the Volvo 5.7 GI Penta. The Volvo is a small-block, fuel-injected, cast-iron V8 known for quick starts, smooth, quiet idling, low emissions and responsive acceleration. A power engine hatch is standard on boats with this engine.

2008 *SSR* PACKAGE

Want the "Look"?

It's all about style, and Bennington offers eye-catching aesthetics to express your individualism.

The R Series **SSR Package** in red, blue or yellow...Includes color-matched side panels, hammered metal interior accents, silver helm accents and wheel, stainless steel rub rail, four Rockford Fosgate speakers and original SSR graphics.

The G and F Series **Sport Package** in red, blue or yellow...Includes sport interior vinyl, silver helm accents with black gauges, silver accent wheel and original sport graphics.

Ragin Red

Vibrant Yellow

Electrical Blue

I/O or Outboard, You Choose.

How do you know whether to choose an inboard/outboard drive system or an outboard to power your Bennington? Both kinds of engines have advantages and strengths. Here's how to choose, based on your needs.

	I/O	Outboard
Easier service/winterizing	-	■
Clean aesthetics	■	-
Better fuel economy	■	-
Lighter weight	-	■
Easier to trailer	■	-
Easier saltwater use	-	■

libly versatile

{ Fun, Function and
Finesse All in One Boat

Here is family fun in a versatile package. The G Series boats are chameleon-like, changing character depending on how you want to use them. They can be wonderful fishing platforms because some now come standard with fish stations and live wells. They can be configured as sport boats with powerful outboards, three pontoons and extended transoms for swimming and skiing. **As with all Benningtons, even without a multitude of options, G Series boats are supremely comfortable.** The standard seating is wonderful with lower back support and built-in storage. G Series boats come standard with full length skirting, a bimini top with trailering struts and a full length playpen cover. If you want more, choose a special value package including tilt steering, docking lights and a deluxe wheel. **Whether you choose a basic boat or one tricked-out with lots of extras, your Bennington G Series packs tons of fun.**

1850 GL shown in Charcoal

2075 GL shown in Colorado Green

2275 GL shown in Mesa Taupe

2008 G Series

The G Series offers a wide variety of floorplans so you can select the one that's right for you. GL, GS and GSi models offer flexibility for cruising, fishing from the bow or fishing from the stern, you choose. Better yet, you can select from a long list of optional equipment to "customize" your boat.

The G Series cuts no corners, using the same quality construction as the R Series with H-36 aluminum pontoons, stainless steel fixtures, comfortable appointments and superior engineering throughout.

G/F Series Reclining Helm *Optional*
The body-contoured reclining helm chair has dual-density foam for initial softness with firm support. It is upholstered in premium grade, soft-touch vinyl.

Quick Release Bimini Top
The structure of the Bennington bimini top is simple, extremely strong and backed by a lifetime warranty. The bimini goes up in seconds, without tools, using a patented Quick Release system that completely eliminates rattles.

2008 SPORT PACKAGE

Sport Bucket Seat
Body contoured and trimmed in silver metallic vinyl.

Black Gauge Dials
Metallic Silver Seat Accents
Bold Color Options
Exterior Sport Graphics
Metallic Silver Dash and Steering Wheel Accents
Also available on F Series

Sport Console
One-piece fiberglass unit with aluminum finished dash and steering wheel trim and chrome-ringed, fog-resistant sport gauges.

ing perfection

Fishing Perfection and Thrilling Performance in One Boat

Start with a lower rail to make casting easier. Add two extremely comfortable, Dura-Frame bow fishing seats, a fully-instrumented mahogany panel console with a flush-mounted Garmin Fish Graph and a 22-gallon built-in live well with bait bucket. Another live well is under the bench seat. **The captain's chair comes with a slider and swivel.** Lockable rod storage is standard, as well as a soft cooler for the fisherman's favorite liquid refreshment. The result? A fishing boat you'll enjoy every time you go out. The F Series boats range from 18 to 22-feet in length and accommodate up to 12 people. That's a party, even if nothing is biting at the moment. F Series boats are available in two-pontoon and three-pontoon configurations.

2050 FSi shown in Wineberry

2275 FSi shown in Colorado Green

2008 F Series

The Bennington F Series is undeniably the best all-around fishing fleet in the industry. FSi models are designed for walk-around space at the bow and stern, an extra large livewell centered in the boat and the ability to add a second livewell with fishing station in the stern. Rod storage is convenient and out of the way...under the port lounge seat. Want to get to the fishing hole faster? Add a performance package to your rig (20 to 22-foot).

Stern-Seat Livewell *Optional*
Fully aerated compartment keeps your catch fresh.

Deluxe Bass Seat *Optional*
This handsome, body-contoured fishing seat incorporates innovative features and a contemporary look. It swivels and folds flat.

Rod Storage
The perfect place to store your rods and accessories, this rod storage locker is vented and lockable.

Tackle Box *Optional*
Keep your best lures organized and ready to go in three handy slide-out compartment trays.

F Series Console
One-piece fiberglass unit with handsome wood grain dash trim, and chrome-rimmed, fog-resistant gauges. Shown with optional deluxe, wood grain steering wheel.

Under-Seat Livewell
The 22-gallon live well has a splash baffle and removable bait bucket. Shown with optional upholstered cushions.

In-floor Storage *Optional*
Large capacity dry storage is down below for all that fishing gear you need close, but out of the way.

Garmin Fish Graph
The fish don't stand a chance when you have Garmin sonar, with a dual-beam transducer for excellent shallow water performance.

great value

Great Value Without Compromising Quality

165 Ei shown in Mesa Taupe

205 E shown in Steel Blue

2250 EL shown in Colorado Green

Nothing else is built like a Bennington, and the E Series stretches your boating budget without construction shortcuts.

The E Series boats range from 16 to 22-feet including the 165Ei, a very compact 16-footer with superb seating, a chaise lounge, seven-person capacity and a maximum engine size of 50 horsepower.

Or, you may choose one of four larger E Series boats that accept more power and more passengers. Whatever size you choose, Bennington value means that, as standard equipment, you get stainless steel corner castings, underdeck spray deflectors, complete instrumentation with tach, fuel and trim gauges, a bimini top made of Surlast® material, trailering struts, a full length Surlast playpen cover, lockable console, a sound system, a soft cooler and dozens of other features that make your day at the lake a day to remember.

- Stern Entry with Built-In Ladder

Console

One-piece fiberglass unit with handsome wood grain dash trim, and chrome-rimmed, fog-resistant gauges.

Aluminum Stern Ladder

Strong, stable, folds up and out of the way when not in use.

Bennington Built

building

Stronger, Extruded "M" Deck Brackets
Instead of the thin, bent sheet metal brackets used on other boats, Bennington uses a thick, M-shaped extrusion. Because the M-extrusion is so wide, the brackets can be spaced on 24-inch centers and still provide much better rigidity than bent sheet metal brackets on 18-inch centers.

Pontoons
Made of H-36 aluminum, 25 percent harder than the H-32 aluminum used by others. H-36 is more dent resistant, less prone to flex and provides maximum strength without added weight.

Stronger Gate Hinge
The gate has a one-piece, full-length, stainless steel piano hinge for strength and to prevent binding.

Rail Spacers for Air Flow
.25-inch rail spacers between the deck and rail allow easy deck drainage and the added ventilation reduces mold and mildew when your boat is covered.

Rattle-Free Rails
All Bennington rail panels have a resilient sealing strip to ensure a quiet, rattle-free ride.

Better at the back

Unlike most competitive boats, on a Bennington, the stern deck brackets are welded over the end cap, the strongest part of the tube to withstand the stresses of today's heavier, high-horsepower engines.

Pressure-Tested Pontoons
Bennington pontoons are made with multiple chambers with valves and separate headers. Each chamber is pressure tested twice.

Full-Length Keels
Choose between a standard full-length keel or the optional solid aluminum full-length keel to improve tracking and protect the boat in the shallows.

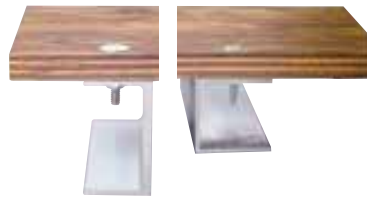

Bennington Built
welds on all four sides.

Other pontoons
weld on only two sides.

Better Rail Construction
Rails are thicker aluminum, welded on all four sides and are anodized after welding for a better finish. They are anchored to the frame, not just to the wooden deck.

ing the best

Bennington Built *Other pontoons*

Channels

Bennington channels are much more robust than those used by other boats. Bennington uses 3-inch tall, .25-inch thick cross channels the entire length of the pontoon. They are twice as thick as those used in most other boats. Greater strength is required to handle today's heavier, higher horsepower engines.

Stronger Elevator Bolts

Instead of the cheap, self-tapping screws used by other builders, Bennington uses stainless steel elevator bolts with large gripping heads and nylon-insert locking nuts to secure the deck to the cross channels.

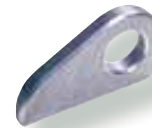

Pontoon Skirting

Long skirting lines provide a polished, highly-finished look to your Bennington. Also, the channel-shape of the skirting functions as a water management component for a drier, more pleasant ride.

Bow Trim

The thick, extruded aluminum bow channel and anodized bow trim not only support the deck, but protect against potential docking damage.

Stronger, Beveled Bow Eye

Durable, thick, extruded aluminum bow eyes are beveled to prevent chafing of dock lines.

Radius Bow Channels

The .25-inch thick radiused bow channel reinforces the heavy-gauge anodized aluminum bow trim for a structure that is stronger and less susceptible to damage than a bow corner casting.

Commitment to Build the Best Boat in the Industry.

Better at the front

To further reduce deck twist and flex common to conventional pontoon boats, the deck extends all the way to the radiused cross-member at the bow.

it's in

Waste Container

This waste storage is integrated into the chaise lounge, out of the way until you need it, and then easily at hand.

Ergonomic Seating

Bennington seats are built on frames with contoured, reinforced supports. The back and seat hold you gently, while the water-tracking system and drain holes keep under-seat storage dry.

Bennington seats begin with a better frame, which is a roto-cast, construction. Then they are upholstered with high density, multi-compression foam – soft to initial touch but highly supportive when compressed. All of which is wrapped in soft, premium grade vinyl that is resistant to mold and mildew. A five-year warranty is standard.

Wiring

Every Bennington model has a main wiring harness uniquely designed for that model. Every harness features marine-grade, waterproof Deutsch connectors.

Raised Helm *optional*

Step up to this raised helm, a curving, carpeted platform that lifts you and your controls to a slightly higher position for a more than slightly better view.

Extended Swim Platform I/O

A dip in the lake is so inviting from your one-piece, contoured, fiberglass platform. It has a strong, side-mounted ladder that folds under and out of the way. The solid surface is non-skid for safety.

Telescoping Ski-Tow Pylon *Optional*
Conceals beneath the sun bed and lifts up for action.

I/O Engine Access

Service is easier and faster with the I/O hull that opens fully. Opening the I/O hull dramatically shows the powerplant for the occasional passenger that wants to see what propels your Bennington.

Furniture Ventilation System

Fresh air can move under and around furniture to keep out mold and mildew. Available on R Series only.

Laser Cut Threshold

An elegant detail, standard on Q and R Series boats, the Bennington name is laser cut into the thresholds at every gate entry.

the details

Make this boat your own.

There are many distinctive features that set Bennington pontoons apart from the competition.

That is why Bennington has the highest customer satisfaction rating in the business. We revolutionized the pontoon industry with comfortable chaise lounges, roomy interiors, unique floorplans and remarkable fit and finish.

Experience the Bennington details. You'll be glad you did.

OEM-Ready Pre-rig

Bennington boats are pre-rigged with only the best OEM cables, controls and wiring harnesses from leading engine suppliers. All gauges are fog-resistant. A Teleflex® system at the helm makes steering effortless.

Quick Release Bimini Top

Backed with a limited lifetime warranty, the bimini top is extremely easy to use and can be raised and lowered in seconds with no tools. The Quick Release mechanism is designed to eliminate all rattles.

Quick Release on Bimini Frame Patented

Quick Release on Bimini Strut Patented

I/O Privacy

Inboard/outboards give you added deck space at the stern that is perfect for an extra large privacy room.

New Playpen Cover

Playpen covers are standard on all Benningtons, but are optional on other brands. The playpen cover protects the interior from the weather. It comes complete with lifting straps that create tenting to reduce puddling and to shed water.

Stainless Steel Engraved Cleat

Standard on the R and Q Series, this heavy-duty, stainless steel cleat is laser engraved with the Bennington name.

Rockford Fosgate Sound System

A true revolution in marine audio, this system gives you brilliance, accuracy and depth. With the optional sub-woofer, you have sound you can feel as well as hear.

options

- a Bimini Top with LED Illumination
- b Under-Seat Livewell
- c Upholstered Gate Panel with Pocket
- d Ski Tow Bar
- e Removable Bow Gate Seat

& accessories

54-Inch Galley

This galley features a luxurious, real granite top delineated by a stainless steel spill rail. Features include a sink, a one-touch, lift-up paper towel holder and stainless steel cup holders. Below is storage, or an optional refrigerator.

Port Table Group *Optional*

This convenient port table group is a fiberglass pod that includes three cup holders, a speaker and courtesy light. A small table surface is finished with a stainless steel accent.

40-Inch Galley
Featuring a sink, one-touch lift-up paper towel holder, storage and stainless steel cup holders and hardware.

20-Inch Chaise Galley *Optional*

Enjoy convenient refreshments in a compact form. It has a granite insert, stainless steel rail, cup holders and faucets and space for an optional refrigerator.

Mahogany Table

Thermalform table in a rich mahogany look has an attractive kidney shape with two integral beverage holders.

Bahama Sands Package

Includes palm leaf carpet, woven texture vinyl accents, braided cording and tropical accent pillows with fringe trim. (In Charcoal, Colorado Green, Lagoon, Mesa Taupe, and Steel Blue).

G/F Series Reclining Helm *Optional*

The body-contoured reclining helm chair has dual-density foam for initial softness with firm support. It is upholstered in premium grade, soft-touch vinyl.
