

UNIQUELY YOURS

Quality. Refinement. Luxury. Comfort. Performance.

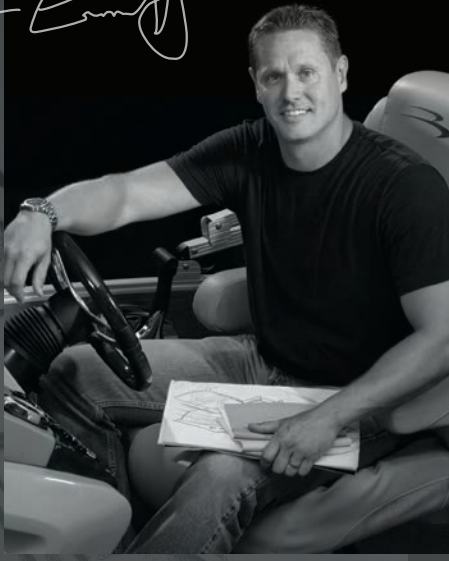

Transforming your boating experience, making it more pleasurable than you ever imagined.

Step aboard.

THE UNMISTAKABLE STYLE OF BENNINGTON

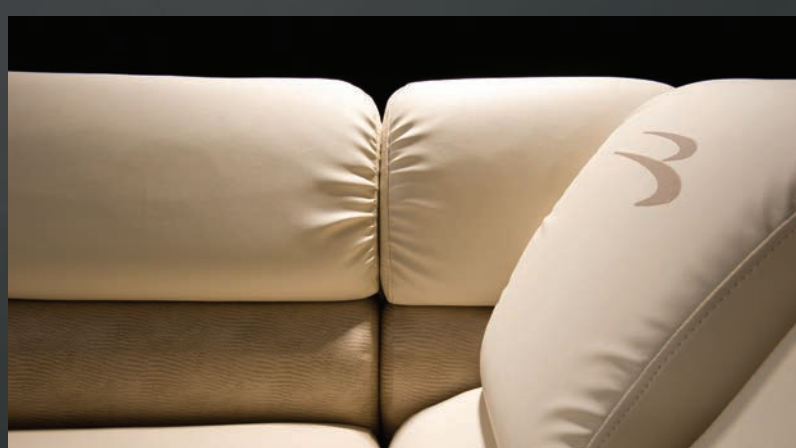

Trent Eekhoff

"We've spent years refining the ultimate boating experience. Since 1997, our mission has been to continuously improve the quality of life of our customers."

Trent Eekhoff, Director of Design

BENNINGTON

DESIGN INNOVATION

Taking the QCW to a new level, Bennington offers exclusive luxury sport options: Shatter Custom Gold Flec Painted Panels, a Sport Tower with Chrome LED Spot Lights and Torpedo Speakers and Diamond Pillow-Top Interior tailored in Icon Soft-Touch Upholstery.

Shatter Custom Painted Panels and Sport Tower available on Q Series models only. Diamond Pillow-Top Interior available on Q & R Series models.

BENNINGTON

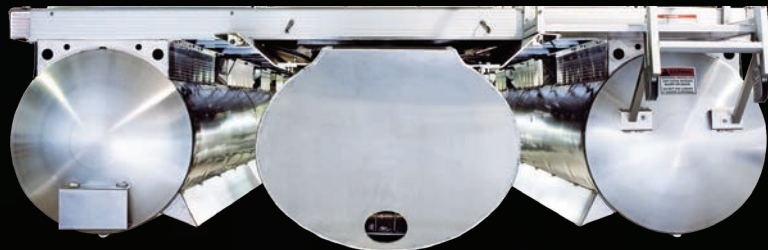

THE ART OF PERFORMANCE

Maximize your experience with one of Bennington's optional performance packages, offering increased handling and maneuverability.

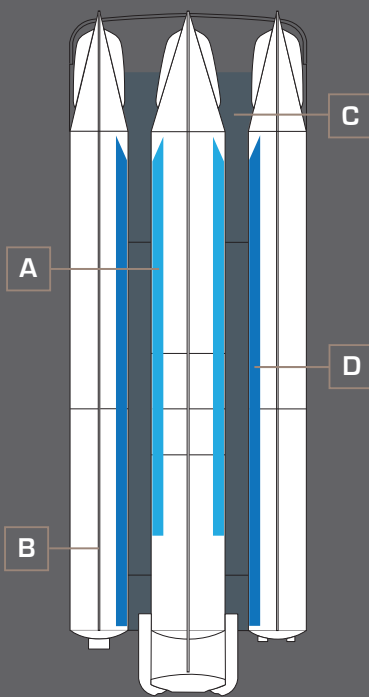

2275 RCW equipped with ESP shown in Matador Red with optional Blade Graphics

ELLIPTICAL SPORT PACKAGE

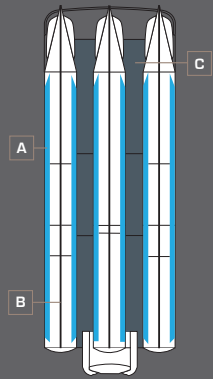

- A. Lifting Strakes
- B. Full Length Solid Keels
- C. Underdeck Waveshield
- D. Performance Foils

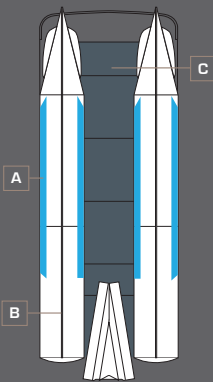

ESP: ELLIPTICAL SPORT PACKAGE

ESP offers stability, performance, planing ability and a sharp turn radius for a “banking” turn. Designed with a patented 32” elliptical center tube and twin performance foils, ESP displaces more water and sits higher in the water for a smooth, dry ride that rivals a fiberglass monohull. Package comes with two 25” diameter pontoons with performance foils, 32” center elliptical tube with lifting strakes, SeaStar[®] hydraulic steering and an underdeck waveshield. We recommend the additional Power-Assist Steering option for engines greater than 150 hp.

STANDARD PERFORMANCE PACKAGE

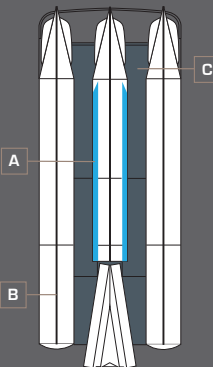

TWIN 32" ELLIPTICAL PONTOONS

Shown with optional Lifting Strakes

EXPRESS TUBE PACKAGE

A. Lifting Strakes

B. Full Length V-Keels (Standard Performance & Express Tube Packages) Full Length Solid Keels (Twin 32" Elliptical Pontoons)

C. Underdeck Waveshield

STANDARD PERFORMANCE PACKAGE

A Bennington Performance Package provides additional bow lift, planing ability and increased performance. Package includes three 25" diameter tubes, underdeck waveshield and SeaStar® hydraulic steering. Add Lifting Strakes for additional speed. Add Power Steering for engines greater than 150 hp.

TWIN 32" ELLIPTICAL PONTOONS

Add our exclusive elliptical pontoons plus lifting strakes to your boat for incredible 2-tube performance, easily achieving speeds around 30 mph with as little as 90 - 115 hp*. Each elliptical pontoon adds over 1,000 lbs. of additional buoyancy, allowing the boat to sit higher & run faster. The width of the elliptical pontoons also increases deck stability both fore & aft as well as side to side.

EXPRESS TUBE PACKAGE

The Express Tube Package offers increased bow lift and moderately increased speed and maneuverability as an affordable alternative to a full-fledged performance package. Package includes a modified center tube and modified waveshield. Add SeaStar® hydraulic steering for engines greater than 115 hp (25" tubes required).

*Boat speeds vary based on load, water conditions, passengers, etc.

UNDERDECK WAVESHIELD

Deflects water from the bottom of the deck, which reduces "surging" and enhances the soft, quiet ride in rough water.

LIFTING STRAKES

Add bow lift, which increases handling across choppy water and improves speed as much as 4.8 miles per hour, depending on engine selection. For optimum performance, lifting strakes are recommended only for engines rated 115 hp or greater and for boats exceeding 30 mph. Lifting strakes are recommended for 90 hp or greater on boats with Twin Elliptical Pontoons.

SEASTAR® HYDRAULIC STEERING

Eases steering effort with higher horsepower engines. Expect two-handed handling in hard turns. Recommended for engines rated 115 or greater.

POWER-ASSIST HYDRAULIC STEERING

Power-Assist Steering is powered by an electronically controlled hydraulic pump connected to the SeaStar® system. The electric pump "does the work for you" so the driver can expect incredible handling and turning with little effort. Recommended for engines rated 150 or greater.

24 SL equipped with Express Tube Package shown in Crimson Red with optional Dimensional Chrome Logos and Sport Graphics

2275 GL equipped with Twin 32" Elliptical Pontoons and optional lifting strakes shown in Bronze with optional Dimensional Chrome Logos and Baja Graphics

BENNINGTON BUILT

Take the time to look under and around any Bennington boat. The quality and attention to detail is unsurpassed. We use only proven construction techniques and the highest quality materials. Since we take no construction short-cuts, Bennington pontoons will be the most solid, quiet riding boats on the water and they are backed by the best warranty in the industry. If you take the time to compare... your choice will be Bennington.

16" On-center Midship Cross Channels

.250" Thick Bow and Stern Cross Channels

Anti-Vibration Process

- Insulated resilient strip applied between all panels and rails
- Insulated resilient strip applied between cross members and decking
- Rails, Furniture & Console through-bolted to cross members

OURS

THEIRS

Competitor's Self-tapping Screws

Bennington Stainless Steel Fanged Elevator Bolt with Nylon Insert Locking Nut

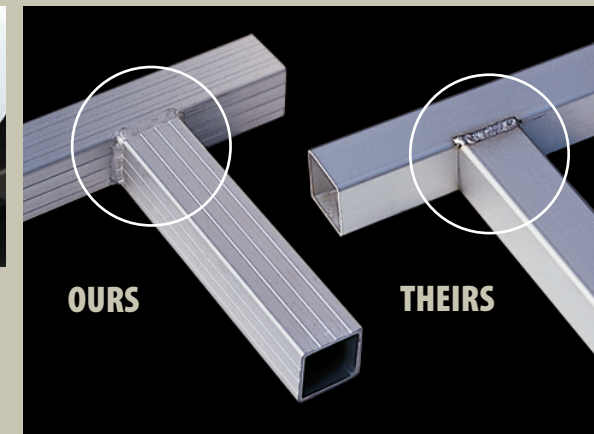

Competitor's 1/8" Cross Channels

Bennington 1/4" Cross Channels

Cross Channels: Our channels are twice as thick as those used by many of our competitors. Bennington's taller 3" channel provides more vertical strength than the typical 2" channel. The heavy-duty cross channels combined with our extruded M-deck brackets and Fanged Elevator bolted deck construction minimizes deck twisting ensuring your Bennington will provide the most solid, quiet pontoon ride in the industry. 3" tall, .250" thick cross channels standard in bow and stern locations. 3" tall, .125" thick cross channels standard in midship locations.

Full-length Keels: Full length keels protect the tubes in shallow water and improve tracking while underway. Optional solid keels are recommended for use in salt water.

OURS

THEIRS

4-Sided Anodized Welding: 1.25" Rails are serrated for strength and good looks, welded on 4 sides (not 2) and anodized after welding for a superior finish.

M-Deck Brackets: Extruded (.125") deck brackets are thicker and stronger than thin sheet aluminum brackets. Our stern deck brackets have **4 points of contact**, distributing weight evenly over the end cap, the strongest part of the tube. We space our deck brackets wider and lower than our competitors, greatly reducing the amount of twisting and racking the deck can experience while in rough water.

Reinforced Bow Radius Channels: Bow decks and corners are reinforced with a .250" radius bow channel that supports the heavy-gauge anodized aluminum bow trim. Stronger than bow corner castings, they are less susceptible to damage.

All under-deck wiring is encased in conduit

FIVE FOAM DENSITIES FOR ERGONOMIC COMFORT

THREE SELF-DRAINING CHANNELS

Our ergonomic design approach offers the industry's most sophisticated seating. All Bennington seating features exclusive **Icon Soft-Touch Upholstery**. The Infinity Topcoat is engineered for ultimate UV stability, easy cleaning, resistance to abrasions, mildew and stains. A Satin texture weave backing allows for smooth, tailored, instant-recovery upholstery with no puckering, or bagging. The unique high density foam used in five compressions provides the perfect combination of support and plush comfort.

Quick Release Bimini: Tops raise and lower in seconds with our patented quick-release fittings designed to eliminate all rattles.

Rattle-free Rails: Rail panels have a resilient sealing strip to ensure a quiet, rattle-free ride.

Heavy Duty Stainless Fittings: Cleats and stern corners are made of stainless steel, providing 3 times the strength of aluminum castings. They won't pit, corrode or discolor.

Rail Spacers: .25" rail spacers are placed between the deck and rail allowing easy deck drainage and ventilation to reduce mold and mildew.

Deutsch Connectors & Wiring: All wiring harnesses feature marine grade, waterproof connectors.

CONSTRUCTION COMPARISON

Bennington offers more exclusive features than the competition.

Bennington Standard:

- HIGHEST IN CUSTOMER SATISFACTION* *year after year*
- LIFETIME STRUCTURAL WARRANTY** **materials and labor**
- FIVE YEAR BOW-TO-STERN WARRANTY*** *including components*
- NMMA CERTIFIED
- SUPERIOR FIT & FINISH – *attention to detail*
- ONE-PIECE FIBERGLASS CONSOLE *with organized wiring*
- ICON SOFT-TOUCH UPHOLSTERY *with 5-year warranty*
- DESIGNER ERGONOMIC SEATING *for ultimate comfort*
- ONE-PIECE ROTO MOLD SEAT FRAMES
- PATENTED QUICK-RELEASE BIMINI FITTINGS
- 10' BIMINI TOP with 1.25" FRAME
- STAINLESS STEEL BOLTED DECK with NYLON INSERT LOCKING NUTS
- 3" TALL, .250" THICK BOW and STERN CHANNELS (*all models*)
- 3" TALL, 16" ON-CENTER MIDSHIP CHANNELS (*Q/R/G models*)
- REINFORCED RADIUS BOW CORNERS (*.250" thick channel*)
- ENCASED UNDER-DECK WIRING *for MAXIMUM PROTECTION*
- STAINLESS STEEL THROUGH-BOLTED CLEATS and CASTINGS
- FULL-LENGTH PONTOON KEELS
- RATTLE-FREE RAILS
- RAIL SPACERS *for SUPERIOR DECK DRAINAGE*
- FOUR-SIDED RAIL WELDS *anodized after welding*
- HEAVY DUTY STERN LADDER *bolted top and bottom*

BENNINGTON WARRANTY

Bennington has been honored with more independent customer satisfaction and quality awards than any pontoon company in the Industry, awarded with the NMMA's Excellence in Customer Satisfaction 10 years in a row. The CSI award recognizes manufacturers who receive an exceptional satisfaction score for overall boat, engine and dealer experience.

BOW-TO-STERN WARRANTY

As a Bennington owner, the first five years are on us. All materials and workmanship on your Bennington are covered – including carpet, upholstery and electronics. No hassles, no worries. The engine is covered by the engine manufacturer's warranty.

LIMITED LIFETIME DECK WARRANTY

As a Bennington owner, you receive a Limited Lifetime Warranty on the 7-ply, pressure-treated, marine grade wooden deck. Since we fasten the rails and deck directly through the under structure, Bennington decks flex less and will provide you with a lifetime of enjoyment.

LIMITED LIFETIME STRUCTURAL WARRANTY

As a Bennington owner, you receive a Limited Lifetime Warranty on the structure, pontoons, gates, channels, motor mount and seat frames. If anything goes wrong, we'll fix it. Season after season, your Bennington will be ready.

TRANSFERABLE WARRANTY

Bennington warranties are transferable through your local Bennington dealer adding to the resale value of your boat. The warranty period begins on the original owner's new boat purchase date. When the boat is sold, the same warranty coverage will carry over to the new owner. The Lifetime Structural Warranty is transferable to a second owner for the balance of 10 years from the original retail date of purchase.

NO HAND-OFF TO OUR SUPPLIERS

Bennington doesn't hand off warranty responsibilities to our suppliers. When it comes to warranty claims, your Bennington dealer will take care of it directly with Bennington. After all, no one cares more about your satisfaction than we do.

NO PRO-RATING

Bennington boats carry the same valuable warranty whether it's the first day or the last day of the warranty period. We do not use a declining scale of value in our warranty, also known as pro-rating.

PARTNERSHIP WITH OUR DEALERS

Bennington dealers receive 100% of the retail shop labor rate for warranty repairs. This ensures that your warranty work is a priority and completed quickly with your satisfaction in mind.

CLUB
BENNINGTON

Expand your experience with Bennington by joining the Club, Club Bennington! This owner's forum includes photo sharing, owner suggestions, on-water stories and helpful hints from Bennington. Post your volunteer events, on-water social events and meet other Bennington owners. Access the Club for Bennington Gear specials, advance notice of new product features and more.
