 Platinum Seagrass aft deck

# PERFORMANCE UPGRADES

## UNDER DECK WAVE SHIELD

Deflects water from the bottom of the deck, which reduces "surging" and enhances the soft, quiet ride in rough water.

## LIFTING STRAKES

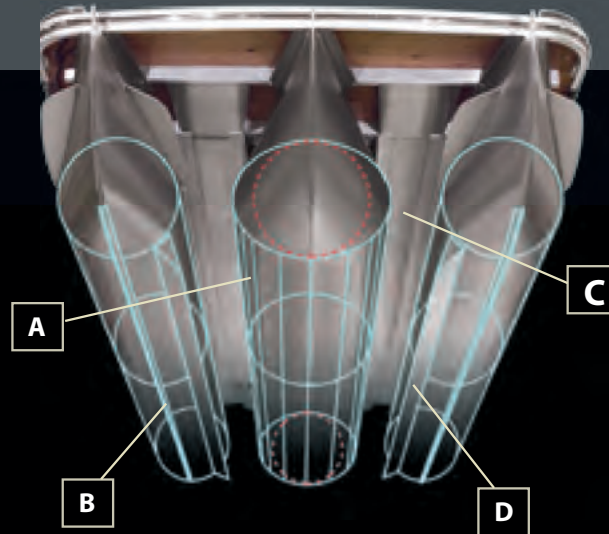

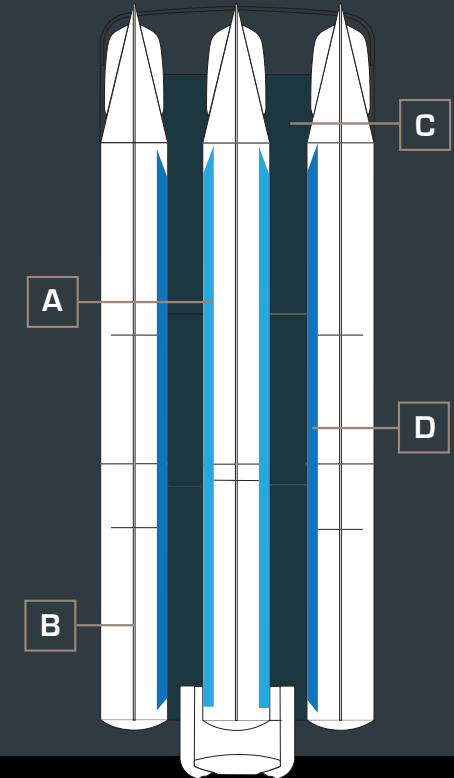

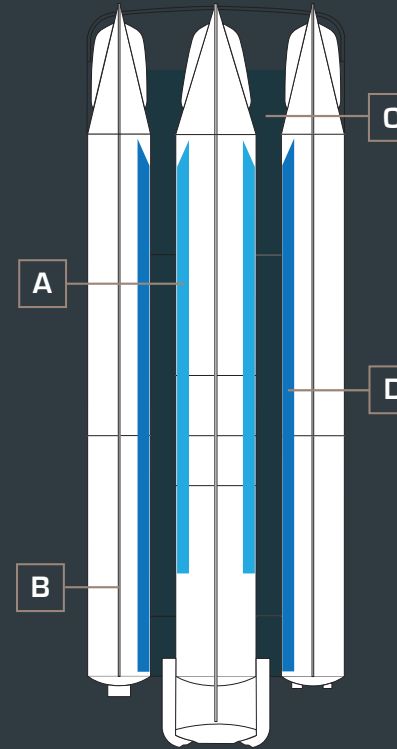

Add bow lift, which increases handling across choppy water and improves speed as much as 5 miles per hour, depending on engine selection. For optimum performance, lifting strakes are recommended for engines rated 115 hp or greater and for boats exceeding 30 mph. Lifting strakes are recommended for 90 hp or greater on boats with twin elliptical pontoons.

## SEASTAR<sup>®</sup> HYDRAULIC STEERING

Eases steering effort with higher horsepower engines. Expect two-handed handling in hard turns. Recommended for engines rated 100-150 hp.

## POWER-ASSIST HYDRAULIC STEERING

Power-Assist Steering is powered by an electronically controlled hydraulic pump connected to the SeaStar<sup>®</sup> system. The electric pump "does the work for you" so the driver can expect incredible handling and turning with little effort. Recommended for engines rated 150 hp or greater.

**A.** Lifting Strakes

**B.** Full-length Solid Round Keels  
(ESP/SPS/Twin Elliptical)

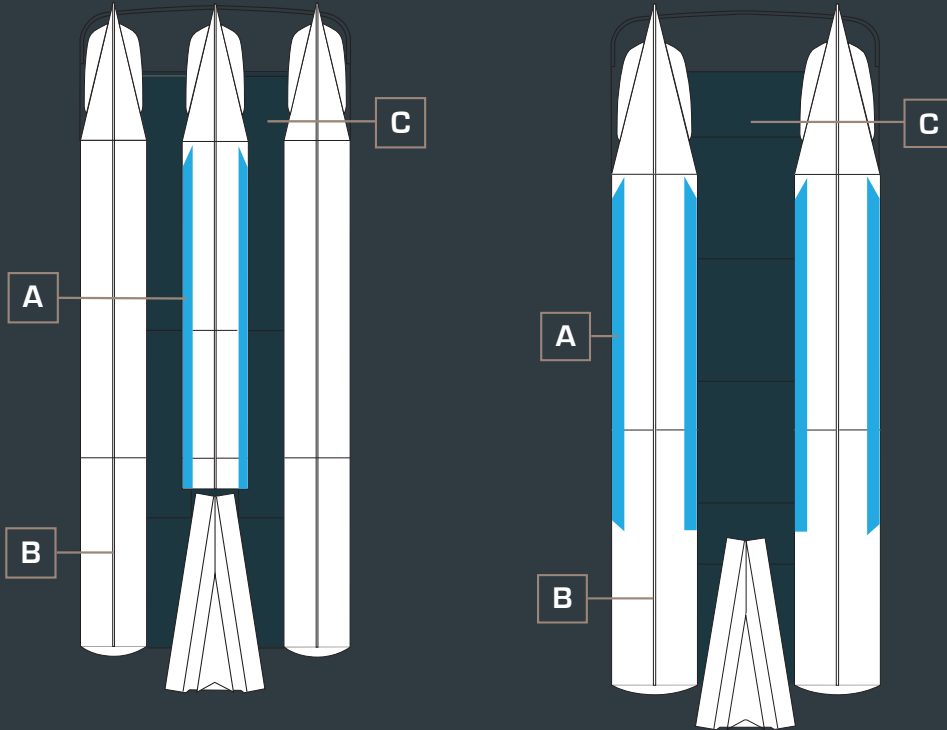

**C.** Under Deck Wave Shield

**D.** Performance Foils

ESP is our premium performance package. It offers enhanced stability and water displacement with quick planing and handling characteristics that rival a fiberglass sport boat. Designed for high horsepower applications, ESP is optional on outboard models and comes standard on all Bennington I/O models. It includes two 25" diameter outer pontoons with performance foils, reinforced splash fins and .100 gauge aluminum, a patented 32" Elliptical center pontoon with lifting strakes and a full under deck wave shield. Power-assist steering and fuel tank upgrade required for maximum performance, especially on boats equipped with 150 hp or more.

The SPS hull offers handling and performance characteristics similar to ESP in an affordable package designed for engines 200 V-4 and less. SPS includes 3 full-length 25" diameter pontoons, lifting strakes on the center pontoon, performance foils on the inside of the outer pontoons, solid round keels on all three tubes, an under deck wave shield, SeaStar<sup>®</sup> hydraulic steering and a 32-gallon transom fuel tank on select models. Ask your dealer about the XL 115 package for a lower horsepower option that's similar to SPS. Available on 20' S Series models only.

The Express Tube Package offers increased bow lift and moderately increased speed and maneuverability as an affordable alternative to a full-fledged performance package. Package includes a modified center tube with lifting strakes, V-Keels on all three tubes, and a modified wave shield. Add SeaStar® hydraulic steering for engines greater than 115 hp (25" tubes required).

Our exclusive Elliptical Pontoons combined with lifting strakes, performance foils, solid round keels and an under deck wave shield offer incredible two-tube performance. Each elliptical pontoon adds over 1,000 lbs. of additional buoyancy, allowing the boat to sit higher and run faster. These pontoons increase deck stability both fore and aft as well as side to side.

## TORQUEEDO Electric Drive

Move cleanly and quietly with the Torqeedo Cruise 4.0 electric outboard, now available on 20-24' SX and S Series models. Our all-new Electric Series pairs the GPS-equipped, 9.9hp equivalent Cruise motor with an advanced lithium-ion battery system, offering incredibly accurate battery charge, speed and remaining range information. Offering record levels of overall efficiency, Torqeedo's system gives you impressive speed and power on restricted waters or anywhere gas is inconvenient to source. The Cruise 4.0 Torqeedo package includes a 10 hp mini motor pan, two Lithium-ion batteries, Torqeedo digital controls, blank console and a 10 hp capacity tag.

Saltwater Ready

Take the time to look under and around any Bennington boat. The quality and attention to detail is unsurpassed. We use only proven construction techniques and the highest quality materials. Since we take no construction short-cuts, Bennington pontoons will be the most solid, quiet riding boats on the water and they are backed by the best warranty in the industry. If you take the time to compare...your choice will be Bennington.

**CROSS CHANNELS**

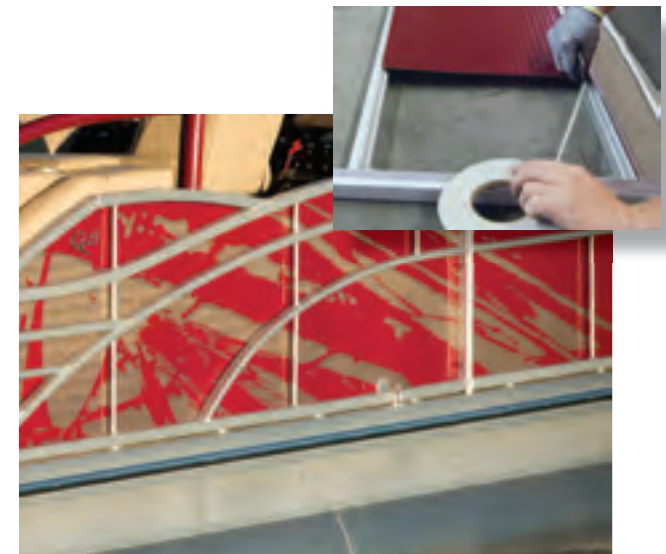

Our channels are twice as thick as those used by many of our competitors. Bennington's taller 3" channel provides more vertical strength than the typical 2" channel. The heavy-duty cross channels combined with our extruded M-deck brackets and Fanged Elevator bolted deck construction minimizes deck twisting ensuring your Bennington will provide the most solid, quiet pontoon ride in the industry. 3" tall, .250" thick cross channels standard in bow and stern locations. 3" tall, .125" thick cross channels standard in mid ship locations.

**.250" Thick Bow and Stern Cross Channels**

Bennington Stainless Steel Fanged Elevator Bolt with Nylon Locking Nut

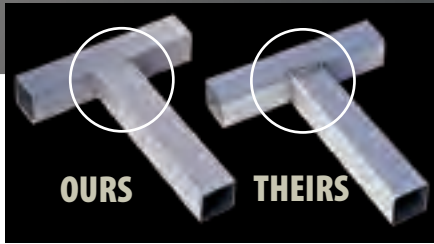

**HEAVY DUTY RAIL SYSTEM WITH DRAINAGE**

The rail system is a solid, rattle free structure thanks to supportive aesthetics and a resilient sealing strip that's placed between each panel and railing touch point. .25" rail spacers are placed between the deck and rail allowing easy deck drainage and ventilation to reduce mold and mildew.

*Winner of the NMMA's CSI award 13 years in a row...Every year since our inception.*

**4-SIDED ANODIZED WELDING**

1.25" Rails are serrated for strength and good looks, welded on 4 sides (not 2) and anodized after welding for a superior finish.

**FULL-LENGTH KEELS**

Full length keels protect the tubes in shallow water and improve tracking while underway. Optional solid keels are recommended for use in salt water.

**RAIL SPACERS**

.25" rail spacers are placed between the deck and rail allowing easy deck drainage and ventilation to reduce mold and mildew.

All flooring is glued and stapled.

All under-deck wiring is encased in conduit

**REINFORCED BOW RADIUS CHANNELS**

Bow decks and corners are reinforced with a .250" radius bow channel that supports the heavy-gauge anodized aluminum bow trim. Stronger than bow corner castings, they are less susceptible to damage.

**M-DECK BRACKETS**

Extruded (.125") deck brackets are thicker and stronger than thin sheet aluminum brackets. Our stern deck brackets have 4 points of contact, distributing weight evenly over the end cap, the strongest part of the tube. We space our deck brackets wider and lower than our competitors, greatly reducing the amount of twisting and racking the deck can experience while in rough water.

**QUICK RELEASE BIMINI**

Tops raise and lower in seconds with our patented quick-release fittings designed to eliminate all rattles.

**EACH BENNINGTON FEATURES EXCLUSIVE ICON™ SOFT-TOUCH UPHOLSTERY.**

Our ergonomic design approach offers the industry's most sophisticated seating. The Infinity Topcoat is engineered for ultimate UV stability, easy cleaning, resistance to abrasions, mildew and stains. A Satin texture weave backing allows for smooth, tailored, instant-recovery upholstery with no puckering, or bagging. The unique high density foam used in five compressions provides the perfect combination of support and plush comfort.

**FIVE FOAM DENSITIES FOR ERGONOMIC COMFORT**

**THREE SELF-DRAINING CHANNELS**

One piece fiberglass consoles with plug and play waterproof Duetsch connectors virtually eliminates the possibility of electrical damage.

Each boat is individually wrapped with protective cloth and heavily shrink wrapped to ensure perfection at time of delivery.

**HEAVY DUTY STAINLESS FITTINGS**

Cleats and stern corners are made of stainless steel, providing 3 times the strength of aluminum castings. They won't pit, corrode or discolor.

Q/R Series Next Generation Dual Console with windscreen

Q/R Series Next Generation Fiberglass Console (standard pre-rig dash)

Q/R Series Next Generation Fiberglass Console (Command Link dash)

\* add additional 12" for swim platform

\*\* XL transom

Hull weights exclude engine, fuel, battery, water and options. Specifications shown are based on an average of each boat length within each Series. Visit [benningtonmarine.com](http://benningtonmarine.com) for model specific specifications.

## BENNINGTON WARRANTY

Bennington takes pride in having high standards and has been honored with more quality and satisfaction awards than any pontoon maker in the industry. Awarded with the NMMA's Excellence in Customer Satisfaction 13 years in a row, our goal is to continuously improve our customer experience and provide boats that offer a lifetime of enjoyment. The CSI Award recognizes manufacturers who receive an exceptional satisfaction score for overall boat, engine and dealer experience.

### **BOW-TO-STERN WARRANTY**

As a Bennington owner, the first five years are on us. \* All material and workmanship on your Bennington are covered – including carpet, upholstery and electronics. No hassles, no worries. The engine is covered by the engine manufacturer's warranty.

### **LIMITED LIFETIME DECK WARRANTY**

As a Bennington owner, you receive a Limited Lifetime Warranty on the 7-ply, pressure-treated, marine grade wooden deck. Since we fasten the rails and deck directly through the under structure, Bennington decks flex less and will provide you with a lifetime of enjoyment.

### **LIMITED LIFETIME STRUCTURAL WARRANTY**

As a Bennington owner, you receive a Limited Lifetime Warranty on the structure, pontoons, gates, channels, motor mount and seat frames. If anything goes wrong, we'll fix it. Season after season, your Bennington will be ready.

### **TRANSFERABLE WARRANTY**

Bennington warranties are transferable through your local Bennington dealer adding to the resale value of your boat. The warranty period begins on the original owner's new boat purchase date. If the boat is sold during its warranty period, the standard warranty coverage will carry over to the new owner once the warranty is transferred through an authorized Bennington dealer.\*.

### **NO HAND-OFF TO OUR SUPPLIERS**

Bennington doesn't hand off warranty responsibilities to our suppliers. When it comes to warranty claims, your Bennington dealer will take care of it directly with Bennington. After all, no one cares more about your satisfaction than we do.

### **NO PRO-RATING**

Bennington boats carry the same valuable warranty whether it's the first day or the last day of the warranty period. We do not use a declining scale of value in our warranty, also known as pro-rating.

### **PARTNERSHIP WITH OUR DEALERS**

Bennington dealers receive 100% of the retail shop labor rate for warranty repairs. This ensures that your warranty work is a priority and completed quickly with your satisfaction in mind.

\*Please visit [benningtonmarine.com](http://benningtonmarine.com) for specific warranty coverage details.

**CLUB BENNINGTON**

Get the most out of being a Bennington owner by registering for the extended **7 Year** warranty coverage. Visit [clubbennington.com](http://clubbennington.com) and register today!
